

INDUSTRIAL WASHING MACHINES

EC20 Eurobin Washer

The EC20 is a compact batch type bin washer with motorised load and unload mechanisms. The standard model will wash and rinse up to 20 standard 200 litre Eurobins per hour, including lids if required.

A twin version is also available, the EC40. IWM will also produce models to accommodate 300 litre buggies and high throughput continuous systems.

Benefits:

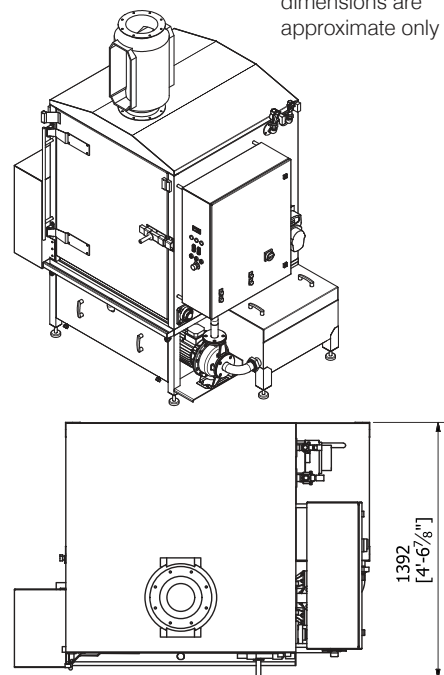

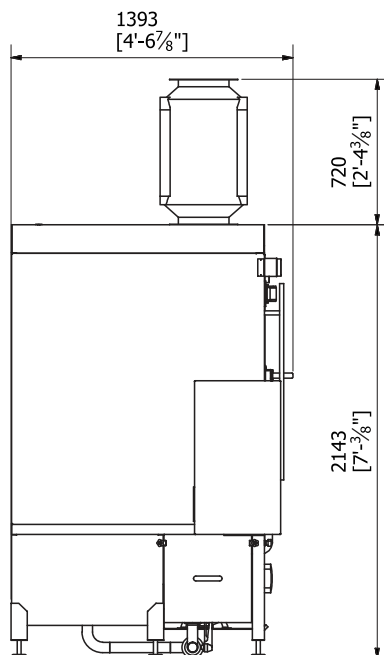

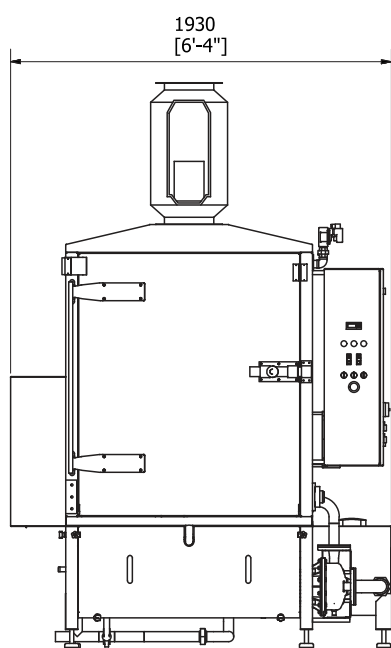

- > Internal bin cleaning via high flow rotary jets
- > Hygienic design complies with all UK and EU standards, and all are CE assessed and certified
- > Cost efficient, dependable and effective washing capabilities
- > Compact footprint where space is at a premium
- > Robust, streamline design with excellent access to all areas for ease of maintenance and cleaning
- > Fully assembled and tested prior to dispatch
