

INDUSTRIAL WASHING MACHINES

Service

Keeping your washing and sanitising equipment in good condition is vital to ensuring that they maintain the highest operating efficiency. IWM offers a full comprehensive service package that covers all of your machines, including non-IWM equipment.

Service options available:

- > Full machine one off service & regular service contracts
- > Temperature validation and calibration
- > Pre audit assessment and reporting
- > Machine move and relocation
- > Full refurbishment
- > Spare parts packages to suit individual machines.
- > Compliance checks to satisfy customer audits.
- > Operator training and instruction
- > Installation services
- > Performed by fully qualified electrical, mechanical and gas heating engineers

STANDARD FEATURES

In general, service visits will include an electrical safety check, temperature checks, chemical dosing, system calibration and general mechanical repairs to ensure optimum performance.

A well serviced & regularly maintained piece of equipment...

- 1 will be more hygienic
- 2 has improved washing performance
- 3 save detergents and/or sanitiser fluids
- 4 use less energy
- 5 minimise risk of breakdown
- 6 provides a safer operation for your workforce
- 7 provides customer confidence in your operation
- 8 can save you money

Recommendation: IWM recommends servicing machines twice a year
