

INDUSTRIAL WASHING MACHINES

SAN100e Sanitising Machine

10 standard models to suit every application and budget

A freestanding sanitiser unit designed to accommodate buckets, bins, plastic bags, tubs, tins and trays up to a maximum size of 450 mm wide by 450 mm high. The machine is designed for low (goods inward) to high-care (production) operation.

Benefits:

- > Newly designed removable top canopy cover enables ease of maintenance with access to all components
- > Hygienic design complies with all UK and EU standards, and all are CE assessed and certified
- > Cost efficient, dependable and effective sanitisation
- > Designed for low - to high-care operation
- > Fully assembled and tested prior to dispatch
